2,190 square feet

Plan Description

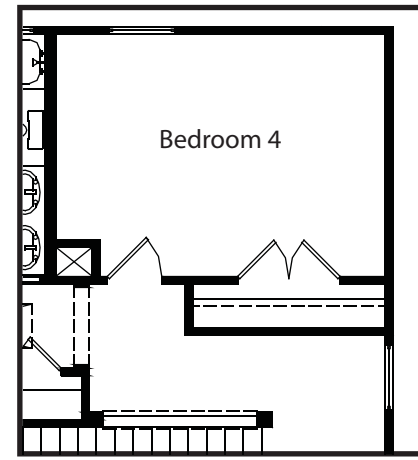

Wide open spaces with room to grow describe this home. 2,190 square feet encompasses 3 bedrooms, 2 ½ baths with plenty of flex options. The formal dining area may be built as an optional study. A barrel arch welcomes you into the family room, which is sized to give you the space needed to entertain or spend time with family. The kitchen extends the open feeling with a wrap around serving bar open to the family room. The breakfast area features a bay window overlooking the backyard. A unique and practical feature is the mud room between the garage and living space. Upstairs features a large game room which can be built as an optional fourth bedroom. The master suite and master bath create a spacious retreat with impressive walk-in closet. The secondary bedrooms are larger than average and both feature walk in closets.

Like having a home builder in the family.
